

No matter what your definition of an office is, we have the solution.

Office Solutions by

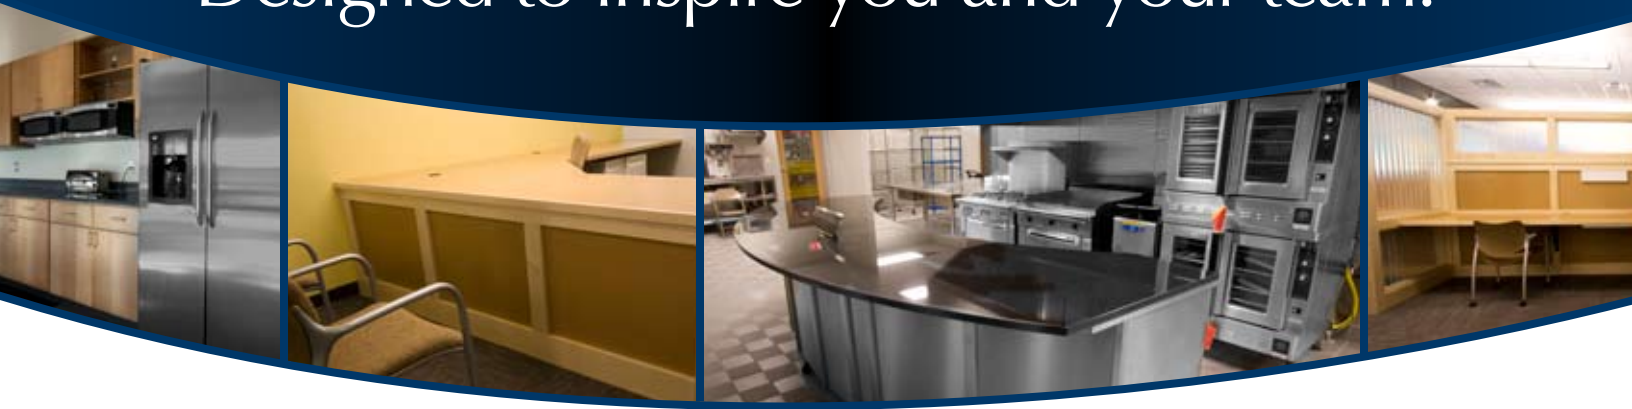

amtekco

A Wasserstrom Company

Manufacturers of Quality Products for the Food Marketing Industry

Designed to inspire you and your team.

From the boardroom to the break room, we can custom design anything you can imagine, including workstations, cubicles, executive desks, conference tables, custom seating, cabinetry, file storage areas and more. The Amtekco team can even provide the electrical components and plumbing preparation and easily incorporate any kitchen equipment you require.

Our designers think outside of the box when it comes to materials and have experience with nontraditional office choices such as steel, granite, marble and other solid surface selections. Every design is carefully thought out with materials and processes that are eco-friendly. We can also help you achieve credits toward your LEED® certification.

If we can create an environment for some of the biggest names in the foodmarket industry, then you can trust us to create a new office space that exceeds your expectations. With decades of experience, we know how to meet tight deadlines on time, and on budget. If you can imagine it, Amtekco can create it.
