Display Better-Sell More

These portable, adjustable, heavy duty slant top ice display merchandisers are constructed to provide optional display flexibility. They are fabricated with heavy duty, 16 ga 304 series stainless steel for extended life. Each unit has multiple angle adjustments, casters for the mobility every merchandiser requires and a fully insulated ice pan to prevent dangerous condensation puddles on the floor. Standard features include: locking casters, insulated ice display pan, perforated removable false bottoms with ice stabilizer strips, profiled stainless steel front, drain and vinyl hose with ball valve for ease of draining. In addition, there are numerous options that must be added or the size may be modified to meet any particular need. Adjustable ice display merchandisers are ideal in the Produce Departments for prepackaged displays of fresh juice displays, in the Deli for cheese or the Meat/Fish Department.

STANDARD FEATURES

- 16 ga 304 series stainless steel
- Fully welded tubular frame
- Casters
- 4 Height adjustments
- Integral cart bumper
- Perforated removable false bottoms with ice stabilizer
- Drain and vinyl hose with ball valve
